Coding Experience

PropSked (www.propsked.ca)

- An online automated service that allows tenants to easily schedule showings without contacting landlords. Landlords can also receive applications after showings (PropSked is already being used by a property management company).
- Worked with a UX/UI designer to finalize the overall design.
- Used **HTML, CSS, Bootstrap 5, JS, Node, Express, MongoDB, MySQL**.

YelpCamp (www.yelpcamp.ca)

- A practise project to build a RESTful API website.
- Users can post campgrounds that they have visited, along with photos and reviews.
- Used **HTML, CSS, Bootstrap 4, JS, Node, Express, MongoDB**.

Other Project

- Created and implemented web scraper (for personal use) to get notice of availability / price drops of specified products.
- Used **Python** (with Selenium), **MySQL**.

Work Experience

FusePM (Leasing and Marketing Division Leader)

January 2017 – January 2022

- Online marketing, renting of properties, leases, and all technical / coding matters, managing ~200 units.
- Co-designed and built company website with **WordPress**.
- Used **VBA** in Microsoft Outlook to auto-reply with dynamic messages to prospect inquiries based on specific criteria.
- Used **Python** to create an automated ad re-listing program of rental properties.
- Saved countless hours of company time spent on replying to over 50,000 applicants individually and re-listing ads daily.

Century 21 (Real Estate Agent)

July 2019 – December 2020

- Created a semi-automated system, allowing interested parties without agents to schedule showings using **Active Campaign** and used **Excel VBA** to create an advanced property investment calculator to aid clients after showings.
- Designed and built a client prospecting website with **WordPress** for myself and my partner.
- Using these systems and the website, helped sell and sold / rented out over \$5,000,000 worth of real estate.
